Programming languages

- expressions
- Statements → (combos of expressions & statements), expressions alone can
- Specifications → use other specifications
    build on statements

— grammar/syntax   "Sam ate an apple"

— Meaning/semantics   "sam ate an apple" → makes sense

"sam sniffed a dream" → no sense, ~~can't~~
                                compiler error

if-statement
if (<expression>) <statement>
